## Experience

### UI/UX-designer / Front-end Developer

**ITCraft**, from March 2011

ITCraft provides full cycle of software development services, web design and mobile applications development.

On my position I designed the multiple social networks (most under NDA), initiated and led the redesign of the biggest thematic community, completed the branding of the online magazine, took part in creating interfaces for two iOS applications.

I was working closely with PM, Development and QA teams. Also I gained experience of work in international remote team.

Was responsible for:

- Design (prototypes and screen mockups)
- Creating UI specifications and related graphics
- UX consulting and design
- Discussing improvements with clients
- Assisting HTML and CSS coding and usability testing

### Web-designer

**SMISS**, April 2007 – May 2010

SMISS is an offshore software development company specializing in design, implementation and maintaining of web-based information systems, web-sites and SOA-systems.

I was involved in design and markup of corporate, e-commerce and promotional sites, interfaces of web services, and infographics. Also I developed several corporate IDs.

### Graphic Designer / Web-developer

Freelance, 2004 – 2011

An independent practice in fields of web-development, design and advertising. During that time I established independent relationships with local clients, made a few sites in different areas with using simple PHP and jQuery, collected showcase of works in print design.

## Education

National Technical University of Ukraine «Kharkiv Polytechnic Institute», 2006 – 2012

Bachelor of Computer Science, Engineer / System Analyst

## Summary

The main area of my work is UI and UX design, as well as optimized semantic html markup.

I am strongly convinced that «design» is based on simplicity, convenience and accessibility.

I am looking for a job with people who are working on useful projects.
